

As part of our ongoing efforts to improve efficiency and offer greater accessibility to your cargo, we are pleased to announce an upgrade to a newer version of the Navis N4 terminal operating system (TOS) at Portsmouth Marine Terminal (PMT), Richmond Marine Terminal (RMT) and Norfolk International Terminals (NIT). The upgrade will be implemented during the month of July.

As part of The Port of Virginia N4 upgrade, there are several considerations you should be prepared for:

- I. PMT and RMT, which currently reside on the same systems as NIT, will be moved to an independent platform. Why?
 - a. A \$350 million investment at NIT will result in a historic renovation and redesign of the existing facility. Deploying a higher level of technology, over the next three years, will require frequent software upgrades.
 - b. PMT and RMT will not experience this degree of short-term change.

PMT, RMT and NIT will not be available beginning 12:00 a.m. until 1 p.m., July ~~9th~~ 15th

If you are using <http://track.portofvirginia.com> to track container status, you will have to specify the location of your search. You will need to choose NIT or PMT/RMT since they will be on separate systems.

The screenshot shows a web browser window displaying the Port of Virginia tracking website. The page has a dark blue header with the logo and navigation links: Home, Tracking, Reports, Support, and Glossary of Terms. Below the header, there is a 'Tracking' section with a red note: 'Note: There are now TWO instances of Navis N4 at the Port of Virginia. Please choose the appropriate N4 instance below.' Underneath, there are two tabs: 'N4 - NIT Tracking' (selected) and 'N4 - PMT/RMT Tracking'. The main content area contains a search form with two input fields: 'Container Numbers' (with a limit of 50 containers) and 'Non-Standard Equipment Numbers' (with a limit of 25 equipment). The form includes buttons for 'Get Unit Status', 'Get Gate Transactions', and 'Close', along with a 'For Date' field and a 'Going Back' dropdown menu set to '1 Day(s)'. The browser's address bar shows the URL 'http://track.portofvirginia.com'.

VIG and PPCY\VIP tracking stays the same at <http://track.portofvirginia.com/vig>, and http://www.vit.org/WebReports/ACT_Console.aspx, - please continue to use these links for VIG and PPCY\VIP container tracking.
